1,700 SCHOOL CHILDREN PLANTED WAR GARDENS

Richmond Youngsters Raise Products Valued at \$42,648 During Summer Months.

WORK WAS MOST SUCCESSFUL.
Most of Products Used in Homes, but Much Is Sold—Demonstration Plots on School Grounds a New and Valuable Feature.

Seventeen hundred public school children in Richmond had successful backyard gardens during the past summer, according to a compilation recently made by Assistant Superintendent J. H. Binford. These 1,700 members of the United States garden army raised vegetables to the total value of \$42,648, and reported that they sold nearly \$4,000 worth of produce in addition to what was used in their homes. One little girl farmerette of the Barton Heights School sold from her plot twenty-five fifteen-cent worth of vegetables in addition to canning a good supply of tomatoes, butterbeans and beets for winter use.

The City school board employed a garden supervisor and three white and two colored garden directors to aid in the work. In addition to the home gardens, school gardens were established in 160 schools, and each older boy who herebefore worked in the manual training work was given a plot of ground to grow vegetables. The total value of the produce raised on these plots was \$1,885. Half of the vegetables were given to the State, and the other half were canned for use in the school canteens.

Cider Vinegar

Apple juice may be made into cider vinegar by allowing two fermentations to take place. The first one changes the sugar of the apple juice into alcohol. Natural yeasts in the air do this, but the process may be hastened by adding yeast cake to each five gallons of juice. The yeast cake should be softened in lukewarm water before adding. When all the sugar is changed into alcohol the next fermentation will be aided by the addition of some good vinegar containing some "mother." Vinegar as a "starter," allow plenty of room for air in the barrel during all stages of fermentation. Keep the temperature 80 to 80 degrees Fhr.

TODAY'S BEAUTY HELP.
We find you can bring out the beauty of your hair to its very best advantage by washing it with Canthrox. It makes a very simple, inexpensive shampoo, which cleanses the hair and scalp thoroughly of all the dandruff, dirt and excess oil, leaving a wonderfully clean, wholesome feeling. After its use, you will find that the hair dries quickly and evenly, and never streaked in appearance and is always bright, soft and fluffy; so fluffy, in fact, that it looks more abundant than it is, and so soft that it is almost impossible to comb. Just use a teaspoonful of Canthrox, which you can get from any good druggist, dissolve it in a cup of hot water; this makes a full cup of shampoo, and although so it is easy to apply it to the hair instead of just the top of the head.—Adv.

"FEEL LIKE YOUNG GIRL NOW," SAYS A VIRGINIA LADY.
Prominent Resident of Salem Gives Interview, in Which She Describes How She Was Relieved of Distressing Complication.

STRENGTHENS KIDNEYS—PURIFIES BLOOD.
You can't expect weak kidneys to keep up and do the right thing. Nature's efforts to filter the acids and poisons out of the system unless they are given a little help. Don't allow your kidneys, the most overworked organs of your body, to become distressed when a little attention now will prevent it. Don't try to cure naturally. As soon as you commence to have backache, feel nervous, tired or worn out without cause, GET BUSY. These are usually warnings that your kidneys are not working properly and throwing out the poisons as they should. Do not delay a minute. Go after the cause of your ailments or you may find yourself in the grip of an incurable disease. GOLD MEDAL HARRISON OIL CAPSULES will give almost immediate relief from kidney troubles, which may be the unexpected cause of ill health. I am always glad to say a good word for Drecto among my friends. I have used it for three months and I feel like a young girl now. (Signed) MRS. E. C. ROVER, Salem, Va.
